Unit 9: none

Unit 10: none

### **Math**

Simple calculator

## Supplemental Reading List for Grades 3-8

To help strengthen student literacy skills, students are encouraged to read books in addition to school assignments. A list of approved books has been prepared that provides age appropriate reading levels. Students must use books from this list for required book reports.

Most of the approved titles are available from your local library. Although every effort has been made to separate books according to age-appropriateness, we realize that tastes differ and not every book on these lists may be appropriate for your family. For this reason, we encourage parents to choose books and read and discuss these books with their child.

### Grade 3
